

Youth Foundations Logistics

Overview and Benefits

Youth Foundations is a course very similar to the Foundations course that Family Academy offers to our parents/caregivers. In this course, youth are encouraged to grow in their awareness of their self-worth and embrace their independence. They do this by addressing their current situations and are motivated to take action to increase their access to resources and transform their consciousness/awareness through their beliefs, core values and mindsets. When our youth participate in Youth Foundations they are not just taking a class, they are contributing to ending generational poverty and building a culture of achievement within themselves, their homes, schools and community.

**Stipends will be given for attendance, completed homework and course completion.*
